

Abortion and Contraception Clinic

The Abortion and Contraception Clinic supports patients in their right to decide if or when to become pregnant. We provide safe and confidential care including the full range of complex family planning services:

- Abortion (medical and procedural)
- Analgesic and anesthesia options for all procedures
- Contraception for people with complex medical problems
- Contraceptive implants, including difficult insertions and removals
- Emergency contraception
- Hormonal and non-hormonal contraceptive methods
- Intra-uterine devices (IUDs), including difficult insertions and removals
- Management of early pregnancy loss/miscarriage
- Pregnancy of unknown location
- Pregnancy options counseling
- Tubal sterilization
